

To discourage the use of the most polluting vehicles, our charges for parking permits are higher for vehicles with higher CO2 emissions and for most vehicles powered by diesel.

If your vehicle was registered on or after 1 March 2001, the price band for your parking permit will depend on the CO2 value stated on your V5C vehicle registration certificate (the “log book”) (you can also find this value by going to <https://www.gov.uk/co2-and-vehicle-tax-tools>)

If your vehicle was registered before March 2001 the price band for your parking permit will be:

- For **petrol or diesel (including bio-diesel)** – the price band that your vehicle falls into will be determined by your vehicle’s engine size (cylinder capacity) stated on your V5C vehicle registration certificate (the “log book”).
- For **alternative fuels including hybrids and electric-powered cars** – alternative fuels are less polluting so we charge one band lower than an equivalent-sized petrol or diesel vehicle. So, for instance, a vehicle with an engine size greater than 3000cc that is fuelled by LPG would fall into price band 5 rather than band 6.

Regardless of its age, **if your vehicle is powered by diesel** (including bio-diesel), **and does not** meet Euro 6 Emission Standards you must pay an additional charge (see below).

Foreign registered vehicles – any vehicle not registered with DVLA is priced in band 4. Please also note that foreign-registered vehicles will only be issued with a maximum of 6 months’ worth of permits, after this no other permits will be issued until the car is registered and taxed in the UK.

Other vehicles – some vehicle registration documents (such as those for some older light goods vehicles and some alternate fuels) do not list either a vehicle’s CO2 emissions or its engine size. If this is the case please either contact us on 020 7926 9000 or call into the Lambeth Contact Centre or one of our parking shops which are listed in the FAQ section of the application form.
